*Donations of \$10,000.00 and above will be
acknowledged on a Donor Recognition Plaque

Happier dogs, happier people!

The Dog Park at Bayfront Park

Background

In October of 2022 The Town of Longboat Key received a generous donation from Ms. Irene K. Hess in coordination with the Rotary Club of Longboat Key. Ms. Hess donated \$123,000, which provided for installation of artificial turf on 75% of the large dog park, as well as new chairs for that side of the park.

The change to artificial turf has proven to be very popular with residents and guests to Longboat Key. The Town's goal for fiscal year 2024 is to complete the project by adding artificial turf to the remaining 25% of the large dog park and to completely cover the small dog park with the K9Grass®. The projected cost is \$175,000.00 to complete both parks.

About K9Grass®

Perfect for paws and people, K9Grass® transforms dog-friendly spaces into a cleaner and better smelling space for both dogs and people. It is 100% drainable with patented Knitted Flow-Through Backing™ that allows for quick drainage of liquids and easy cleanup. It is also crafted with Alphasan® antimicrobial technology to help deter the growth of harmful microbes. This provides a cleaner park environment for your canine friends, a more aesthetically pleasing experience for dog park guests, and significantly less maintenance costs once installed.

K9Grass® is constructed with premium materials and installed using customized methods for long-term durability.
